PROJECTS

E-Vehicle Servies   **Jan. 2022 – June. 2022**

Our esteemed Vehicle Service platform aims to streamline and expedite the process of vehicle maintenance. Through our sophisticated application, customers can seamlessly book their vehicle services with accredited service providers online. Our providers are dedicated to enhancing convenience by offering a comprehensive service package, including the facilitation of pick-up and drop-off services, ensuring a hassle-free experience for our valued customers. Embrace efficiency and simplicity in vehicle maintenance with our innovative solution.

Book Nerds   **Aug. 2021 – Dec. 2021**

This web application, developed using the Python programming language, serves as a user-friendly platform facilitating both the purchase and sale of books. The primary goal of this application is to promote environmental sustainability by encouraging the reuse of books, thereby contributing to the reduction of paper consumption. Additionally, customers benefit financially by availing themselves of the opportunity to purchase second-hand books at a cost-effective rate. Embracing the ethos of sustainability and fiscal responsibility, our application aims to create a meaningful and eco-conscious marketplace for literature enthusiasts.
